

# MEET THE AESTHETIC LEADERS

# AGEJET® PLASMA TECHNOLOGY

# DOCTOR NINA DEEP

Written By: Kellie Galvin

**D**r. Deep has enjoyed a lifelong interest in art, design, and aesthetics. These passions prompted her to open Nina Deep MD Aesthetics in 2005. She comes from a large family of physicians including both of her parents, her two siblings, seven of her aunts and uncles, six of her cousins, her husband and two of her in-laws (and two of her children are attending medical school). After receiving her medical degree from Northeast Ohio Medical University in 1994, she specialized in Internal Medicine and was recognized as one of Columbus' Top Doctors by The Columbus Dispatch.

Nina Deep Aesthetics is a small boutique-style practice dedicated to providing exceptional care to each person who walks through its doors.

Dr. Deep specializes in a select number of non-surgical aesthetic procedures that

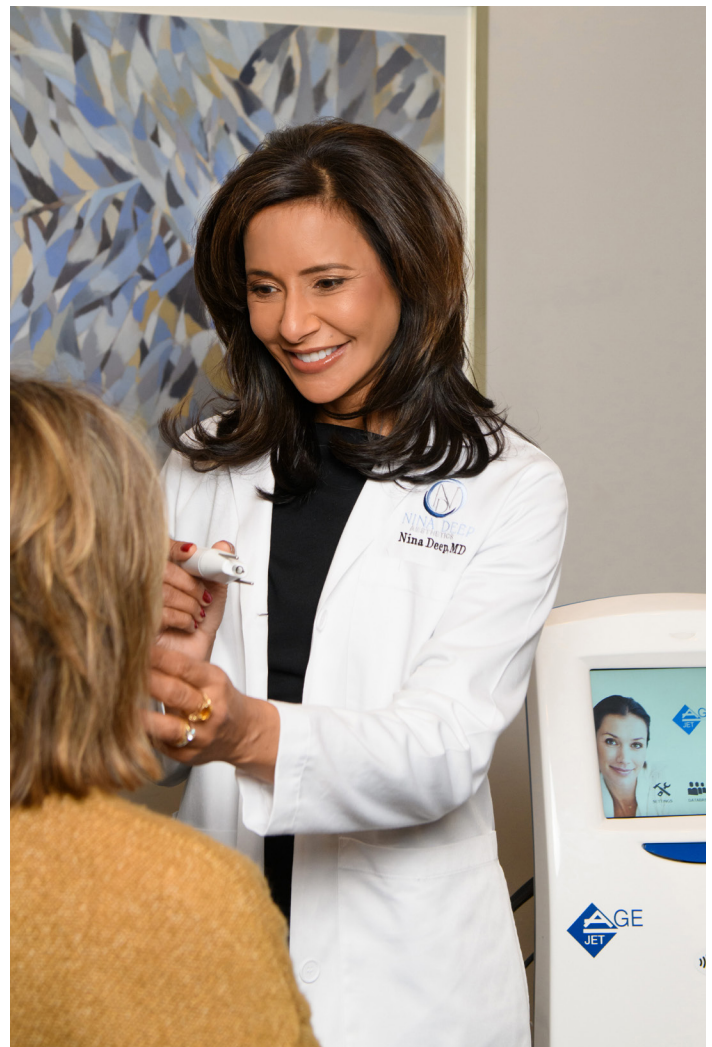

strive to provide natural-looking results. Always seeking advanced treatments, she discovered AgeJET® technology. AgeJET® is nitrogen plasma technology that treats the skin from the inside out. The technology is not new, but it has recently been upgraded to an outstanding treatment for patients of ALL skin types for skin laxity, wrinkles, age spots, acne, and precancerous Lesions. The all new AgeJET EYE is used, with superior results, to treat the sensitive upper and lower eyelids, so reflect the patient's younger version of themselves by appearing wider, brighter, and more youthful. In the past, patients with darker skin types couldn't take advantage of the benefits of laser resurfacing without potential side effects, and patients who were ideal candidates for laser resurfacing had to deal with the discomfort of treatment along with peeling and redness for up to 1 to 4 weeks to be completely healed. Using AgeJET®, Dr Deep's patients healing time is a fraction of the time used to with traditional laser and ultrasound technologies

### **The AgeJET® Eye is the holy grail of eye treatments.**

Dr. Deep has extensive experience in this industry to curate only those procedures that are safe, comfortable, and quick for her patients, hence the reason she discarded all the lasers in her practice that couldn't equal the safety, comfort, and quick recovery AgeJET® can produce. Dr. Deep explains that plasma (not to be confused with "blood"

plasma or PRP) provides a regenerative skin therapy using Nitrogen Gas. Simply put, energy travels into the deeper skin layers without breaking the surface layers. more youthful appearance and will continue to improve for up to a year! To quote Dr. Deep, "I don't understand why plasma technology is not everywhere, but I couldn't be happier to offer it to my patients." Just for the record, Dr. Deep is not a paid spokesperson for AgeJET® just a huge fan of a company that can produce what it promises.

After years of experience working with nitrogen plasma technology, Dr. Deep was introduced to AgeJet when selected

to test for clinical evaluations on AgeJET® technology. What she's discovered is 'less energy is better.' She realized when treating her patients with less energy that they were recovering quickly and still getting amazing results with lower levels of energy. "It's a new, and better, method to deliver results we expect. Like Tesla and electric cars, AgeJET® goes beyond the traditional light-based modality systems of lasers, RF, and ultrasound. Once you try it, you'll quickly realize the efficiency, safety, efficacy and immediate benefits to your practice." AgeJET® is expected to be available in 2022.

**The AgeJET® is the new Tesla skin treatment of the century.**

There's a calm confidence about Dr. Deep that she's earned with her dedication to her profession and passion for helping her patients seek solutions. She encourages women to maintain a healthy balance between hyper-focusing on looks while accepting that looks change; it is natural to hold on, but she offers solutions to move on to graceful aging. Dr. Deep speaks eloquently about women and beauty and has a lot to say on the subject. "I think it's important for women to understand that their appearance has value at any age and caring for it requires effort at every age." When asked about her definition of beauty, she replied, "I would say I feel most beautiful when I am connecting with others, whether it is a friend or family member, a patient, a student, or even a stranger. That is when

my inner and outer selves feel most in alignment." Dr. Deep is distinctly aware she is a trailblazer in a generation of women in aesthetics, where technology, treatments, and definitions of beauty are constantly changing, and 'looking as good as you feel' should be more than just a pleasant cliché; it should be a lifestyle adopted by smart and thoughtful women as they journey through the aging process.

Dr. Nina Deep is an active member of The Women's Fund of Central Ohio that invests in the potential of women and girls. She is nationally recognized as an expert in facial injections and is a sought-after trainer throughout the United States. Her years of experience and artistic eye benefit her patients and have distinguished her as a leader in the aesthetics industry.
